ABSTRACT:

PURPOSE: To provide an electronic mail delivery equipment in which mail circulation is smoothed without stagnation and a sender always grasps it to which a circulated mail is circulated by changing the circulation order of the circulation mail on the way of circulation so as to delay the circulation order of absent persons.

CONSTITUTION: Upon the receipt of a circulation mail, a mail reception function 12 of an electronic mail delivery equipment 2-1

returns a reception  
notice to a sender electronic mail delivery equipment sending  
the mail at first  
and serves the received circulation mail to a recipient B.  
When the recipient B  
desires to change a recipient to which the mail is circulated  
succeedingly, the  
succeeding circulation recipient is designated. Thus, when a  
re-transmission  
circulation mail transmission processing section 112  
generates the circulation  
mail for re-transmission, the circulation order of a  
circulation list is  
changed and the circulation mail is sent to the changed  
succeeding circulation  
recipient.
